

Resolution 1

Author of the resolution: Children and Youth Committee of the FRC Southwest Finland district

In 2025, the National Youth Committee launched the online Network of Young Advocates, which aims to increase discussions between young advocates. It is also known that there are individual or district-run youth activity groups that are active in their own regions across Finland. The Children and Youth Committee of the Southwest Finland district believes that the National Youth Committee should also increase its direct cooperation with activity groups, at least those run by districts.

Currently, the National Youth Committee is required to report to the Youth Assembly every three years, presenting its achievements over the past operating term. We would like to see an active presentation of activities and objectives at least annually, with the opportunity to comment. A separate procedure could be used for addressing larger matters.

Closer cooperation will ensure that the activities of the National Youth Committee are more accessible and familiar to young people interested in the advocacy work of our organisation. This cooperation will also help to amplify the voices of young people at a national level in the advocacy work carried out by the National Youth Committee throughout the operating terms.
